Properties

- Hydraulically folding side wings
- Suspended interchangeable blades
- Shock valves in the side wing cylinders, the wings flex when they hit an obstacle
- Available for all standard front loaders
- VAMA Q1-FIT bolt-attachable fittings (not H and M models)

Winged buckets

The VAMA winged buckets are well suited for versatile snow work, where snow is ploughed and piled. Good examples of this are industrial areas, parking areas, streets, school play-grounds and so on. It is convenient to pile snow in heaps with the winged bucket or, if necessary, pile it to be transported away.
